Research, technology, quality and solutions for food industry

FMT s.r.l. is an Italian company specialized in engineering and construction of turnkey plants and free-standing machines for food industry.

Founded in 1997 by the persons with long experience in food-tech sector, FMT s.r.l. has been constantly increasing, gaining an important space of the market and realizing a wide range of technological solutions, appreciated all over the world.

All the machines realized by FMT are characterized by high quality, reliability, efficiency and flexibility, making them suitable for different applications in food and beverage market.

The leading sectors of applying FMT solutions are the filling lines in cans, jars and bottles (glass or plastic) for the following products:

- Sauces and dressings
- Edible oil and greases
- Pickles
- Preserved fruit and honey
- Baby food and purée
- Ready meals
- Cream cheese and milk-based products
- Soups
- Preserved meat and fish
- Still beverages or juices
- Beer and carbonated soft drinks

FILLERS (SINGLE AND MONOBLOCKS)

- Filling and capping monoblocks for plastic and glass containers
- Volumetric piston fillers for liquid, semi-liquid and thick products
- Linear vibration fillers for solid products in pieces
- Telescopic (pocket) fillers per solid products in pieces
- Gravity fillers for flat liquids
- Flow-meters fillers for flat liquids
- Hot-fill fillers for flat liquids
- Vacuum fillers for preserving liquids
- Filling and seaming groups for metal cans

CAPPING SYSTEMS (METAL CAPS, SUCH AS TWIST-OFF, PT, ETC.)

- Linear capping machines
- Automatic caps feeders
- Vacuum detectors

High-tech Machines for Food and Beverage Industry

THERMIC TREATMENT TUNNEL SYSTEMS

- Pasteurizers
- Coolers
- Warmers

CONVEYING SYSTEMS FOR LINES

- Depalletisers for empty jars, bottles and cans
- Palletisers/depalletisers for bulk jars, bottles and cans
- Palletisers for cartons, packs and trays
- Robotic handling systems
- Conveyor systems for containers and cases
- Elevators, lowering devices, overturners

PRODUCT PROCESSING AND TRANSFORMATION PLANTS

- Plants for vegetables de-salting
- Plants for washing and sorting of vegetables
- Plants for vegetables grilling
- Blanchers for vegetables
- Plants for storage and preparation of liquids (oil, vinegar, brine etc.)
- Plants for legumes rehydration
- Plants for aseptic bags emptying
- Plants for preparation and crashing of frozen products (fruit)
- Mixers and thermic bunkers for sauces, jams and thick products

High-tech Machines for Food and Beverage Industry

FMT has developed the global solutions designed for automation of the systems and packaging processes. FMT is a company and a technological partner with the capacity to realize, adapt and customize its own products to the various needs of the market for food and beverage industries.
